

Healthcare System Partnership Services

Diagnostic Solutions for Healthcare Systems

Digirad can help you improve and expand your Hospital and Healthcare System by delivering scalable diagnostic solutions and administrative services on an as needed, where needed, and when needed basis.

Hospitals and healthcare systems are on the front lines of the changing healthcare landscape. Insurers expect greater efficiencies, physicians and their patients are demanding higher quality service, and you are charged with watching the bottom line. It's a lot to manage and Digirad can help.

Digirad provides turn-key, diagnostic solutions to hospitals and healthcare systems looking to increase profitability. Our services are provided on an as needed, when needed, where needed basis. This flexibility helps you increase patient satisfaction and retention while at the same time reducing overhead.

Digirad delivers to your point of care. Instead of having fixed assets at multiple locations, we bring the equipment and staff where your needs are. For example, instead of five different sets of imaging equipment and staff to operate them along with incremental management support costs, Digirad can customize an operational solution for maximum clinical and economic efficiency.

Contact Digirad and see how we can help you increase patient satisfaction, lower overhead and grow your profit.

Turn-key Solution:

- Imaging & Diagnostic Equipment
- Licensed Technologists
- Accreditation
- PACS Integration

Service Offerings:

- Mobile & Fixed Site Nuclear
- Mobile & Fixed Site Ultrasound
- Neuropathy
- Diagnostics
- Staffing
- Equipment Rental
- Cardiac Event Monitoring
- Repair & Maintenance

Why Do Healthcare Systems Choose Digirad?

- Ability to provide the same consistently high level of services at all clinic locations
- Higher percentage of system patient capture
- Eliminate referrals outside of network due to geographic limitations
- Service line extension for integrated primary care and integrated specialists
- Development of and extension of organization standards and patient care protocols
- Creation of a true outreach program that leads to significantly more patient access, significantly more down stream services and significantly more revenue for the system and their hospitals

About Digirad

Digirad has been providing in-office solutions to healthcare providers for over 13 years. Today, we are the largest point-of-care provider in the United States.

Digirad delivers to your point of need
