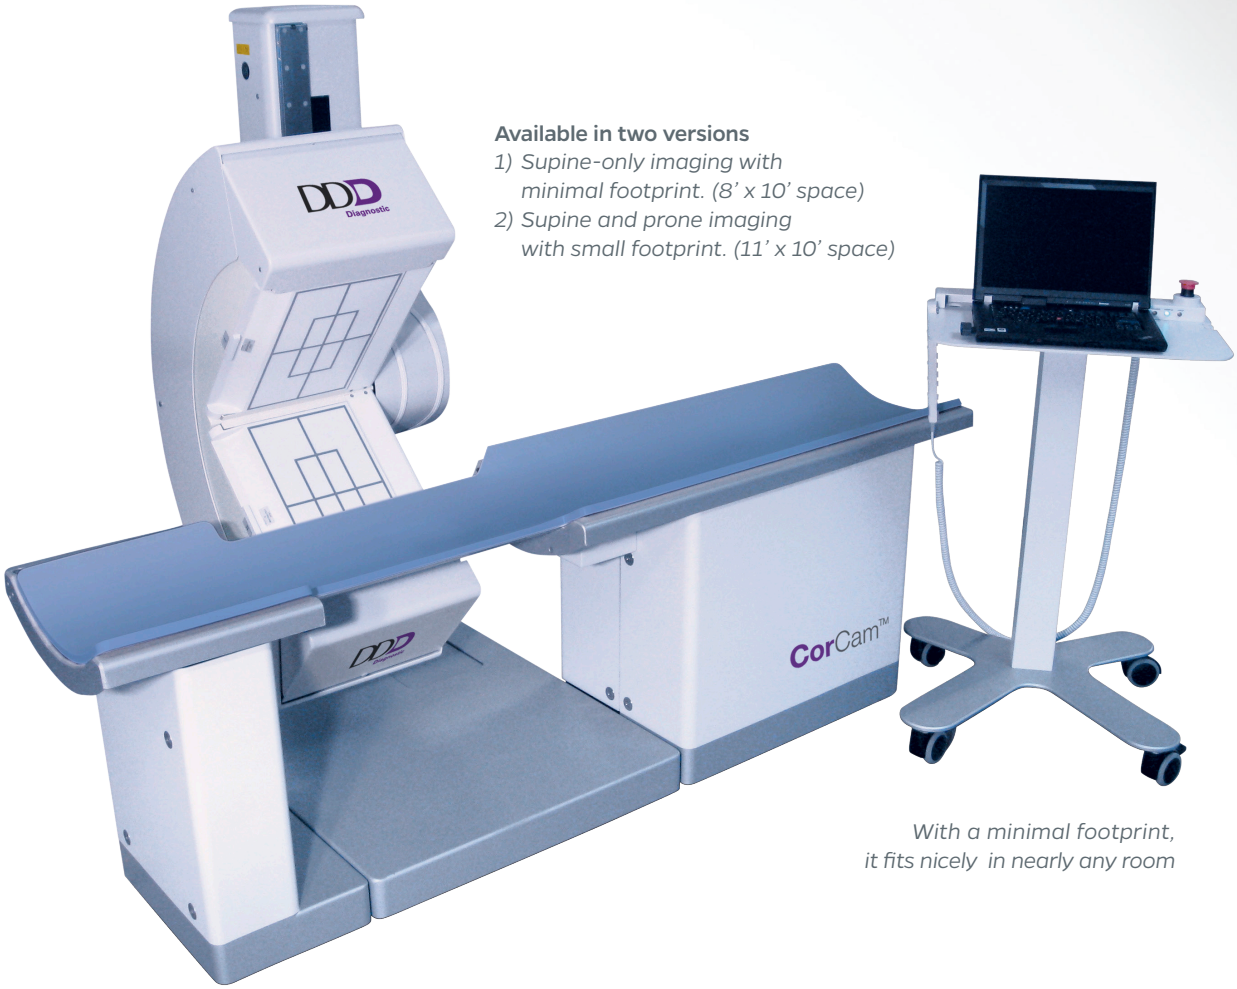
CorCam™

DDD Gamma Camera System

Available in two versions

1) Supine-only imaging with minimal footprint. (8' x 10' space)

2) Supine and prone imaging with small footprint. (11' x 10' space)



With a minimal footprint, it fits nicely in nearly any room

The CorCam features two fixed 90-degree detectors each with a 36cm x 20.4cm field of view (FOV) and 24 high-resolution low-profile photomultiplier tubes providing high detector performance and excellent resolution.

Optimized
Designed for quick and seamless Myocardial Perfusion Imaging.

Easy-to-use
Truly open gantry allows for greater patient comfort.

Proven
Highly reliable and well proven gamma camera.

Cohesive
Integrates with hospital infrastructure – DICOM Modality Work List.
