Transform Your Existing Ergo

Digirad is committed to the Ergo platform and our customers who use this groundbreaking camera every day.

Through the Ergo Boost package, we're offering an easy way to transform your existing equipment and achieve a new level of benefits from your investment in Ergo.

Boost your Ergo to the next level with an upgrade that adds **battery life, processing power, and more!**

Enhanced Security

With an Ergo Boost package, your camera will be upgraded to Windows 10 operating system. With a new, integrated computer and the most up-to-date patches, your Ergo is more secure than ever.

CSView Package

The Ergo Boost upgrade package includes the Cedars CSView processing package. Now you can view and process studies directly from the camera without the need to transfer the data to a separate processing station.

Charged and Ready

The Ergo Boost package includes a brand new, lithium-ion battery. This complete replacement utilizes the latest technology available and delivers 8x battery life, enabling you to spend more time focusing on patient care.

Full Refresh

The Boost package includes a new, larger monitor, a 250 GB SSD hard drive, exterior panels, and a storage container.

Get more from your Ergo camera and use it in new ways with Boost.

Why Upgrade Your Ergo?

Go Mobile

With 2 hours of mobile battery use, you can now use your Ergo on the go and not worry about recharging.

Enhanced Security

With a Windows 10 operating system and an on-board computer, your Ergo can become much more secure.

All-In-One Processing

With Windows 10, Cedars CSView, and wireless technology, you can now process directly on the Ergo and spend more time focusing on what matters most – your patients.

Faster Recharge Times

In addition to longer battery life, the recharge time is now 4x faster than the previous generation Ergo.

Pricing and Availability

Upgrade kits are in-stock, and the Digirad upgrade team is scheduling appointments now for installation. Contact your field service or camera sales representative to learn more.

How the Upgrade Process Works

- Ergo Boost upgrades are performed at your location.
- A member of the Digirad Ergo upgrade team will visit your facility and perform the work at your office.
- Upgrades take approximately three days to complete and can vary depending on the state of your current Ergo.
- Ergo Boost upgrades include an extended warranty on the new equipment, and regular service visits are included.
- Additionally, training is provided on how to use the updated tools and software.
